

RECLASSIFICATION OF CERTAIN TOYO TIRES EPA SMARTWAY PRODUCTS

In the current edition of the Toyo Tires Commercial Truck Tires Product Brochure (#0180115 (09/10)), Toyo offers the following four commercial truck tire products that are U.S. EPA SmartWay verified:

M127™

Premium Free Rolling
and Steer

M154™

Premium Regional/
All-Position Steel Radial

M137™

Premium High
Performance Steer

M657™

Premium Drive

These products have been sold as EPA SmartWay verified, having been tested, verified and listed on the EPA website as SmartWay verified technology. However, recent changes in the EPA's SmartWay verification test protocol have necessitated the reclassification of the M127 and M154 model tires manufactured after December 31, 2010.

This means that the M127 and M154 model tires manufactured beginning with the serial week 0111 will no longer carry the EPA SmartWay verification.

This reclassification in no way changes the expectations for fuel efficiency, long tread life, endurance and overall premium quality that our customers have come to expect of the M127 and M154 tires.

The M137 and M657 model tires will continue to be classified as EPA SmartWay verified products.

The next printing of the Toyo Tires Commercial Truck Tires Product Brochure will reflect these changes as well information on new EPA SmartWay verified products.
